| Preface  | XI        |
| <b>1. Nano-enhanced Polymer Applications in Oil and Gas Industry: A Review</b>             | <b>1</b>  |
| 1.1 Introduction   | 1         |
| 1.2 Polymer Nanocomposites for Engineering Material Enhancements                           | 2         |
| 1.3 Polymeric Nanoparticles and Polymer-Stabilized Nanomaterials as EOR Agents             | 5         |
| 1.4 Improvements to Hydraulic Fracturing Processes   | 8         |
| 1.5 Improvements to Oil Drilling Processes   | 12        |
| 1.6 Conclusion   | 14        |
| References   | 15        |
| <b>2. Application of Polymer Nanocomposites in Oil and Gas Industry</b>                    | <b>19</b> |
| 2.1 Introduction   | 19        |
| 2.2 Polymer Nanocomposites in Upstream Processes   | 20        |
| 2.2.1 EOR  | 20        |
| 2.2.2 Drilling Fluids  | 22        |
| 2.2.3 Anti-corrosion Coatings  | 24        |
| 2.2.4 Oil Spill Cleanup  | 29        |
| 2.3 Polymer Nanocomposites in Downstream Processes   | 31        |
| 2.3.1 Natural Gas Processing   | 31        |
| 2.3.2 Oily Wastewater Treatment  | 35        |
| 2.4 Conclusion   | 37        |
| Abbreviations  | 38        |
| References   | 40        |
| <b>3. Associative Polymer Applications in Chemical Injection for Enhanced Oil Recovery</b> | <b>51</b> |
| 3.1 Introduction   | 51        |
| 3.1.1 Gas Injection  | 51        |
| 3.1.2 Thermal Injection  | 52        |
| 3.1.3 Chemical Injection   | 52        |
| 3.2 Scope of Polymers in EOR   | 52        |
| 3.2.1 Working Principle  | 53        |
| 3.2.2 Commonly Used Polymers for EOR   | 53        |
| 3.3 Associating Polymers   | 54        |
| 3.3.1 Synthesis  | 56        |

|  |            |
|--|------------|
| 3.4 Characterization of Polymer Interactions                               | 61         |
| 3.4.1 Hydrophobic Interactions   | 61         |
| 3.4.2 Stability under Reservoir Conditions                                 | 61         |
| 3.5 Rheology of Associating Polymers                                       | 62         |
| 3.5.1 Viscosity in Dilute State  | 64         |
| 3.5.2 Viscosity in Semi-Dilute State                                       | 65         |
| 3.5.3 Chemical Interaction   | 65         |
| 3.5.4 Flow of Associating Polymers in Porous Rocks                         | 66         |
| 3.6 Conclusion   | 67         |
| References   | 68         |
| <br>   |            |
| <b>4. Xanthan Gum as Advanced Polymer System for Enhanced Oil Recovery</b> | <b>75</b>  |
| 4.1 Introduction   | 75         |
| 4.2 Structure  | 77         |
| 4.3 Production   | 78         |
| 4.4 Properties and Surface Modifications                                   | 79         |
| 4.5 Applications   | 82         |
| 4.5.1 Enhanced Oil Recovery Process  | 82         |
| 4.5.2 Dispersant for Drilling  | 87         |
| 4.5.3 Tackifier for Drilling   | 90         |
| 4.5.4 Corrosion Inhibitor for Mild Steel                                   | 91         |
| 4.5.5 Chemical Absorption of Carbon Dioxide                                | 92         |
| 4.5.6 Fracturing Fluids  | 92         |
| 4.5.7 Removal of Dyes from Aqueous Solutions                               | 93         |
| 4.6 Summary and Outlook  | 93         |
| References   | 95         |
| <br>   |            |
| <b>5. Polymeric Materials for Oil Spill Clean Up and Phenol Removal</b>    | <b>101</b> |
| 5.1 Introduction   | 101        |
| 5.2 Polymer Based Sponges and Foams for Oil Spill Clean Up                 | 103        |
| 5.3 Polymer Based Aerogels for Oil Spill Clean Up                          | 113        |
| 5.4 Polymer Based Fibers for Oil Spill Clean Up                            | 115        |
| 5.5 Polymeric Membranes for Oil-Water Mixture Separation                   | 120        |
| 5.6 Other Polymer Absorbents for Oil Spill Clean Up                        | 125        |
| 5.7 Polymeric Adsorbents for Phenol Removal                                | 130        |
| 5.8 Conclusion   | 133        |
| References   | 137        |

|   |            |
|---|------------|
| <b>6. Resorcinol-Formaldehyde Cryogel Nanocomposites for Oil Spill Clean Up</b>           | <b>147</b> |
| 6.1 Introduction  | 147        |
| 6.2 Materials and Methods   | 148        |
| 6.2.1 Materials   | 148        |
| 6.2.2 GO Preparation  | 149        |
| 6.2.3 Preparation of PZTs   |            |
| 6.2.4 Synthesis of Graphene-PZT based R-F Cryogel Containing Cobalt Ferrite Nanoparticles | 149        |
| 6.3 Adsorbent Characterization  | 150        |
| 6.4 Oil Sorption Studies by Cryogels  | 151        |
| 6.5 Results and Discussion  | 151        |
| 6.5.1 Structure and Morphology of Adsorbent   | 151        |
| 6.5.2 Hydrophobicity and Oil Sorption Capacity of Cryogels                                | 155        |
| 6.6 Conclusion  | 159        |
| References  | 160        |
| <b>7. Polyurethane Membranes for Gas Separation</b>                                       | <b>165</b> |
| 7.1 Introduction  | 165        |
| 7.2 Theory of Membrane Gas Separation   | 166        |
| 7.3 Ideal Membrane Characteristics  | 168        |
| 7.4 Influence of Polyurethane Structure on Permeability and Selectivity                   | 168        |
| 7.4.1 Influence of Hard and Soft Segments   | 168        |
| 7.4.2 Effect of Urethane/Urea Content   | 174        |
| 7.4.3 Effect of Temperature and Pressure  | 174        |
| 7.4.4 Effect of Molecular Chain Extension   | 175        |
| 7.4.5 Effect of Polymer Blending  | 176        |
| 7.4.6 Effect of Modifiers and Fillers   | 178        |
| 7.5 Other Natural Gas Specific Applications   | 188        |
| 7.6 Conclusion  | 189        |
| References  | 190        |
| <b>8. Polymer Modified/Enhanced Adsorbents for Gas Adsorption and Sweetening</b>          | <b>203</b> |
| 8.1 Introduction  | 203        |
| 8.2 Polymer Enhanced Adsorbents for CO <sub>2</sub> Capture                               | 205        |
| 8.2.1 Carbon Adsorbents   | 206        |

|   |            |
|---|------------|
| 8.2.2 Metal Organic Frameworks (MOF) and Porous Polymer Networks (PPN)          | 215        |
| 8.2.3 Silica Based Adsorbents   | 217        |
| 8.3 Polymer Enhanced Adsorbents for H <sub>2</sub> S Capture                    | 219        |
| 8.4 Polymer Enhanced Adsorbents for SO <sub>x</sub> and NO <sub>x</sub> Capture | 221        |
| 8.5 Summary and Outlook   | 223        |
| References  | 224        |
| <b>9. Polymeric Pipeline Coatings for Oil and Gas Industry</b>                  | <b>231</b> |
| 9.1 Introduction  | 231        |
| 9.1.1 Pipeline Coatings   | 231        |
| 9.1.2 Requirements for Long Lasting Performance of Coatings                     | 232        |
| 9.2 Advancements in Polymeric Pipeline Coatings: A Brief Summary                | 232        |
| 9.3 Polymeric Pipeline Coatings   | 234        |
| 9.3.1 Polyolefin Based Pipeline Coatings  | 234        |
| 9.3.2 Epoxy Based Pipeline Coatings   | 241        |
| 9.3.3 Polyurethane Based Pipeline Coatings                                      | 247        |
| 9.3.4 Fluoropolymer Based Pipeline Coatings                                     | 251        |
| 9.4 Conclusions   | 255        |
| References  | 257        |
| <b>10. Biopolymer Coatings</b>  | <b>263</b> |
| 10.1 Introduction   | 263        |
| 10.2 Cellulose  | 264        |
| 10.3 Chitosan   | 268        |
| 10.4 Starch   | 277        |
| 10.5 Polylactide  | 278        |
| 10.6 Vegetable oil based coatings   | 279        |
| References  | 284        |
| <b>11. Epoxy Composite Coatings for Enhanced Corrosion Resistance</b>           | <b>293</b> |
| 11.1 Introduction   | 293        |
| 11.2 Experimental Details   | 294        |
| 11.2.1 Materials  | 294        |
| 11.2.2 Substrate Preparation  | 294        |
| 11.2.3 BADGE Composite Coatings   | 295        |
| 11.2.4 Characterization Techniques  | 295        |
| 11.3 Results and Discussion   | 297        |
| 11.4 Conclusion   | 307        |

|  |            |
