Preface	XI
1. Flame Retardancy in Polymers: New Advances	1
1.1 Introduction	1
1.2 Mechanism of Polymer Combustion	2
1.3 Mechanism of Polymer Retardancy	4
1.4 Polymer Retardancy Techniques	5
1.5 Experimental Measurement Techniques	9
1.6 Recent Developments	10
1.6.1 Polymer Nanocomposites (PNC)	11
1.6.2 Phosphorous Compounds	23
1.6.3 Chlorinated Paraffin (CP)	26
1.7 Conclusions	26
References	27
2. Polystyrene-Zeolite Composites: Filler Dispersion, Mechanical, Thermal and Rheological Properties	35
2.1 Introduction	35
2.2 Experimental	39
2.2.1 Materials and Zeolite Synthesis	39
2.2.2 Generation of Polystyrene Composites	40
2.2.3 Materials Characterization	40
2.3 Results and Discussion	42
2.4 Conclusions	61
References	62
3. Influence of Copolymers on the Mechanical, Thermal and Rheological Properties of Isotactic Polypropylene (iPP) and Impact Polypropylene Copolymers (IPCs): A Comparative Study	65
3.1 Introduction	65
3.2 Experimental	70
3.2.1 Materials	70
3.2.2 Preparation of PP/Copolymer Blends	71
3.2.3 Materials Characterization	71
3.3 Results and Discussion	72
3.3.1 Calorimetric Properties and Phase Miscibility of PP/Copolymer Blends	72

3.3.2 Thermal Properties of PP/Copolymer Blends	77
3.3.3 Diffraction Analysis of PP/Copolymer Blends	79
3.3.4 Rheological Properties of PP/Copolymer Blends	81
3.3.5 Mechanical Properties of PP/Copolymer Blends	87
3.4 Conclusions	90
References	91
4. Hybrid Fillers and Composites	97
4.1 Introduction	97
4.2 Hybrid Nanofillers	98
4.2.1 Synthesis of Hybrid Nanofillers	98
4.2.2 Properties of Hybrid Nanofillers	102
4.3 Hybrid Nanofillers Reinforced Polymer Nanocomposites	106
4.3.1 Polymer Nanocomposites Reinforced with Hybrid Nanofillers Generated using Physical Methods	108
4.3.2 Polymer Nanocomposites Reinforced with Hybrid Nanofillers Generated using Chemical Methods	115
4.4 Applications	120
4.4.1 Coatings	122
4.4.2 EMI Shielding	124
4.5 Conclusions	126
References	126
5. Polymer-PZT Nanocomposites for Enhanced Flame Retardancy and Conductivity: Review and Case Study	135
5.1 Introduction	135
5.2 Preparation of Polymer/PZT Nanocomposites	137
5.2.1 Melt Blending	137
5.2.2 Solution Blending	137
5.3 Analysis of Flame Retardancy	138
5.3.1 Thermal Stability	138
5.3.2 Limiting Oxygen Index (LOI)	138
5.3.3 UL-94 Test	139

5.3.4 Cone Calorimetry	140
5.4 Flame Retardancy of Polymer/PZT Nanocomposites	140
5.5 Conductivity of Polymer/PZT Nanocomposites	144
5.6 Case Study: PP/PZT Nanocomposites: Thermal Stability and Flame Retardancy	148
5.6.1 Introduction	148
5.6.2 Experimental	149
5.6.3 Results and Discussion	151
5.7 Conclusions	160
References	161
6. Effect of Molecular Structure on Mechanical, Thermal, Rheological and Morphological Properties of High Molecular Weight Polyethylene	167
6.1 Introduction	167
6.2 Experimental	169
6.2.1 Materials	169
6.2.2 Characterization Methods	169
6.3 Results and Discussion	171
6.4 Conclusions	187
References	188
7. Melt Processed Poly(ether-block-amide) Nanocomposites with Graphene Nano-platelets	191
7.1 Introduction	191
7.2 Experimental	194
7.2.1 Materials	194
7.2.2 Generation of Poly(ether- <i>b</i> -amide)- Graphene Nanocomposites	195
7.2.3 Materials Characterization	195
7.3 Results and Discussion	197
7.4 Conclusions	217
References	218
8. Mechanical, Thermal, Rheological and Morphological Properties of Binary and Ternary Blends of PLA, TPS and PCL	221
8.1 Introduction	221
8.2 Experimental	223
8.2.1 Materials	223

8.2.2 Generation of Polymer Blends and Test Specimens	223
8.2.3 Characterization Techniques	224
8.3 Results and Discussion	225
8.3.1 Thermal Analysis	225
8.3.2 Mechanical Analysis	229
8.3.3 Rheological Analysis	234
8.3.4 Morphological Analysis	238
8.4 Conclusions	242
References	244
9. Polymer Nanocomposites with N-doped and P-doped Graphene	247
9.1 Introduction	247
9.2 Synthesis of Doped Graphene	249
9.2.1 Solvothermal and Hydrothermal Approach	249
9.2.2 Sol-gel Method	252
9.2.3 Chemical Vapor Deposition	252
9.2.4 Ion Transport Mechanism	258
9.2.5 Thermal Treatment	259
9.2.6 Ball Milling	262
9.2.7 Self-assembly	262
9.3 Polymer Nanocomposites with Doped Graphene	264
9.3.1 Polyaniline Nanocomposites	265
9.3.2 Polypyrrole Nanocomposites	265
9.3.3 Poly(vinylidene fluoride) (PVDF) Nanocomposites	267
9.3.4 Polyethylene Nanocomposites	268
9.3.5 Fluoroelastomers based Nanocomposites	268
9.3.6 Epoxy Nanocomposites	268
9.3.7 Polystyrene Nanocomposites	270
9.3.8 Polyurethane Nanocomposites	271
9.4 Conclusions	271
References	271
10. Recent Advances in Synthesis and Applications of Polymer Nanofibers	283
10.1 Introduction	283
10.2 Polymer Nanofibers	285
10.3 Processing Methods of Polymer Nanofibers	287
10.3.1 Template Synthesis	287

Contents

IX

10.3.2 Electrospinning	288
10.3.3 Drawing	290
10.3.4 Self-assembly	290
10.3.5 Phase Separation	292
10.4 Synthesis of Polymer Nanofibers	293
10.5 Applications of Polymer Nanofibers	297
10.6 Conclusions	304
References	304
