<b>Preface</b>	<b>XI</b>
<b>1. Photoresponsive Liquid-Crystalline Polymers with Azobenzene Chromophores</b>	<b>1</b>
<i>Shudeng Ma, Shuai Huang and Haifeng Yu</i>	
1.1 Introduction	1
1.2 Homopolymers Containing Azobenzenes	3
1.3 Supramolecular Liquid-Crystalline Polymers Containing Azobenzenes	8
1.4 Liquid-Crystalline Block Copolymers Containing Azobenzenes	14
1.5 Photomechanical Liquid-Crystalline Polymers Containing Azobenzenes	22
1.5.1 Early Stage	23
1.5.2 Recent Progress	25
1.5.3 Liquid Crystal and Polymer Composition	31
1.5.4 Dilemma	33
1.6 Outlook	34
References	35
<b>2. Developments in the Use of Liquid Crystalline Polymers for Generating Nanohybrids</b>	<b>45</b>
<i>J.-D. Marty</i>	
2.1 Introduction	45
2.2 Stabilization of Preformed Nanoparticles	48
2.2.1 Critical Role of LC/NP Interactions	48
2.2.2 Stimuli Responsive Materials	51
2.3 In-situ Synthesis of Liquid Crystal/Nanoparticle Hybrid Materials	56
2.3.1 Formation of Hybrid through Solvent Mediated Methods	57
2.3.2 In-situ Formation within a Thermotropic Phase	58
2.3.3 Towards Anisotropic Growth of Nanoparticles	60
2.4 Conclusions and Future Perspectives	63

References	64
<b>3. Main Chain LCPs and Their Applications in Electronics</b>	<b>69</b>
<i>Suhana Mohd. Said, Muhammad Akmal Kamarudin, Nik Muhd. Jazli Nik Ibrahim and Mohamad Syafie Mahmood</i>	
3.1 Introduction	69
3.2 Applications of LCPs	72
3.2.1 Electronic Applications	73
3.2.2 Charge Transfer in LCPs	74
3.2.3 Effect of Processing Parameters for LCP Performance	81
3.2.4 Dielectric Anisotropy of LCPs and Its Applications	84
3.2.5 Optical Effects in LCPs	87
3.2.6 Ferroelectricity in LCPs	93
3.2.7 Electrorheological Effect in LCPs and Its Applications	96
3.2.8 Controlled Drug Delivery	99
3.2.9 Light Activated LCPs	102
3.3 Conclusions	104
References	105
<b>4. Photoresponsive Main Chain Liquid Crystalline Polymers</b>	<b>113</b>
<i>Asit Baran Samui and Kolli Balakrishna</i>	
4.1 Introduction	113
4.1.1 Commonly Used Chromophores in Photoactive Liquid Crystalline Polymers	114
4.1.2 Liquid Crystalline Polymers (LCPs)	115
4.2 Photochromic LC Polymers	119
4.2.1 Main Chain LC Polymers	119
4.2.2 Combined Main-Chain/Side-Chain Liquid Crystalline Polymers	123
4.2.3 Photocrosslinkable Liquid Crystal Main-Chain Polymers	126
4.2.4 Photoresponsive Block LC Polymers	126
4.2.5 Bisbenzylidene Based Main Chain LCPs	127
4.3 Oligomers	132

4.3.1	Photoresponsive Main-Chain Oligomers	132
4.3.2	Macrocycles Containing Azobenzene Main Chain Oligomers	132
4.4	Liquid Crystalline Elastomers	133
4.4.1	Photocrosslinking of Main Chain LCE	134
4.4.2	Nanoparticle-Liquid Crystalline Elastomer Composites	134
4.5	Supramolecular Assembly	135
4.6	Typical Synthesis Methods for Main Chain LC Polymers	136
4.7	Opto-mechanical Effects	138
4.7.1	Shape Memory Polymers	138
4.7.2	Liquid Crystalline Elastomers as Actuators and Sensors	140
4.7.3	LC Anisotropic Gels	146
4.7.4	Ferroelectric Liquid Crystals	146
4.7.5	Light-Sensitive Microcapsules Based on Liquid Crystalline Polyester	148
4.7.6	Photoresponsive Membranes	150
4.8	Nonlinear Optical (NLO) Polymers	151
4.9	Conclusions	154
	References	156
<b>5.</b>	<b>Synthesis and Liquid Crystalline Properties of 1,3,4- Oxadiazole Derivatives with a Terminal (R)- 1- methylheptyloxy Group</b>	<b>165</b>
	<i>Jie Han, Fu-Li Wang, Juan-Juan Sun, Yan-Mei Wang</i>	
5.1	Introduction	165
5.2	Results and Discussion	167
5.2.1	Synthesis	167
5.2.2	Liquid Crystalline Properties	167
5.3	Conclusions	170
	Experimental	171
	References	177
<b>6.</b>	<b>A Facile Synthetic Route to Novel Thermotropic Liquid Crystalline Polymers by Bulk Reaction or Reactive Extrusion and Characterization of Their Mesophases</b>	<b>181</b>
	<i>Kyoung Hwan Oh, Hoyeon Kim and Yongsok Seo</i>	

6.1	Introduction	181
6.2	Materials and Methods	182
6.2.1	Mesogen Synthesis	182
6.2.2	Polymer Synthesis	184
6.2.3	Characterization	185
6.3	Results and Discussion	186
6.3.1	TLCPS Synthesized by the Reactions Between LCE1 or LCE3 with Aniline (PDEA1 and PDEA3)	186
6.3.2	TLCPS Synthesized by the Reactions between LCE1 or LCE3 with 1-naphhtyl amine (PDEN1, PDEN3, PDEN1R and PDEN3R)	191
6.4	Conclusions and Outlook	199
	References	201
<b>7.</b>	<b>Segmented Liquid Crystalline Copolyesters</b>	<b>205</b>
	<i>Katherine V. Heifferon and Timothy E. Long</i>	
7.1	Introduction	205
7.1.1	History of Polyesters	205
7.1.2	History of Liquid Crystalline Polymers	206
7.1.3	History of Segmented Copolymers	208
7.2	Synthetic Overview	208
7.2.1	Basics of Polyester Synthesis	209
7.2.2	Synthesis of Thermotropic LC Polymers	214
7.2.3	Synthesis of Segmented LC Copolyesters	224
7.3	Properties of Segmented LC Copolyesters	235
7.3.1	Orientation of Segmented LC Copolyesters	242
7.4	Conclusions	244
	References	245
<b>8.</b>	<b>Smectic Phases of Rod-Like Helical Polymers</b>	<b>257</b>
	<i>Kento Okoshi</i>	
8.1	Introduction	257
8.2	Smectic Phases of Rod-Like Polymers	259
8.2.1	Theoretical Predictions	259
8.2.2	Experimental Verifications	260

8.3	Smectic Phases of Binary Mixtures of Rod-like Polymers	265
8.3.1	Theoretical Predictions	265
8.3.2	Experimental Verifications	266
8.4	Smectic Phases of Binary Mixtures of Rod-like Polymers and Spherical Molecules	269
8.4.1	Theoretical Predictions	269
8.4.2	Experimental Verifications	270
8.5	Conclusions	271
	References	272
