| Preface | IX |
| 1. The Effect of NaOH on the Properties of Fly Ash-Based Geopolymer | 1 |
| <i>Gökhan Görhan and Gökhan Kürklü</i> | |
| 1.1 Introduction | 1 |
| 1.2 Geopolymers | 3 |
| 1.3 Sodium Hydroxide | 4 |
| 1.4 Physical and Mechanical Properties of Geopolymer Materials | 8 |
| 1.4.1 Effect of NaOH on the Properties of Geopolymer Paste | 10 |
| 1.4.2 Effect of NaOH on the Properties of Geopolymer Mortar | 11 |
| 1.4.3 Effect of NaOH on the Properties of Geopolymer Concrete | 13 |
| 1.4.4 Effect of NaOH on the Properties of Geopolymer Material | 14 |
| 1.5 Durability Properties of Geopolymers Materials | 16 |
| 1.5.1 Geopolymer Mortars Exposed to Na ₂ SO ₄ and MgSO ₄ Solutions | 19 |
| 1.6 Conclusions | 24 |
| References | 26 |
| 2. Shaping and Thermal Resistance of Geopolymers Based on Different Aluminosilicate Sources | 35 |
| <i>A. Gharzouni, L. Ouamara, A. El Khomsi, I. Sobrados and S. Rossignol</i> | |
| 2.1 Introduction | 35 |
| 2.2 Shaping of Geopolymers Based on Different Aluminosilicate Sources | 37 |
| 2.3 Thermal Behavior | 38 |
| 2.3.1 Effect of Aluminosilicate Source and Alkali Cation | 39 |
| 2.3.2 Effect of Filler | 47 |
| 2.4 How to Control the Thermal Resistance? | 55 |
| 2.5 Conclusions | 56 |

| | |
|---------------------------------------------------------------------------------------------------|-----------|
| References | 58 |
| 3. Nano-modified Solid Wastes-based Geopolymers | 63 |
| <i>Xiaolu Guo, Xuejiao Pan and Linglin Xu</i> | |
| 3.1 Introduction | 63 |
| 3.2 Experimental | 64 |
| 3.2.1 Raw Materials | 64 |
| 3.2.2 Methods | 64 |
| 3.3 Setting Time and Rheological Properties of Geopolymer Materials | 68 |
| 3.3.1 Factors Analysis on Setting Time | 68 |
| 3.3.2 Factors Analysis on Rheological Properties | 70 |
| 3.4 Durability of Nano-modified Geopolymers from WBP-CFA | 73 |
| 3.4.1 Impermeability and Water Absorption | 73 |
| 3.4.2 Frost Resistance | 74 |
| 3.5 Pore Structure and Inner Chemical Environment of Nano- modified Geopolymers from WBP-CFA | 76 |
| 3.5.1 Pore Structure | 76 |
| 3.5.2 Inner Chemical Environment | 79 |
| 3.5.3 Microstructure Characterization | 80 |
| 3.6 Conclusions | 86 |
| References | 88 |
| 4. Characteristics of Geopolymers Derived from an Industrial Sludge and Metakaolin | 91 |
| <i>Noureddine Belmokhtar, Mohammed Ammari, Mohamed Ouchen and Laila Ben Allal</i> | |
| 4.1 Introduction | 91 |
| 4.2 Characteristics of Raw Materials | 93 |
| 4.3 The Behavior of Calcined Industrial Sludge and Metakaolin vis-a-vis Sodium Hydroxide Solution | 98 |
| 4.3.1 FTIR Studies of Alkali-activated Materials | 99 |
| 4.3.2 Microstructure of Alkali-activated Materials | 102 |

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------|------------|
| <i>Contents</i> | VII |
| 4.4 Effect of the Dissolution of MB on the Compressive Strength of Hardened Alkali-activated Materials | 103 |
| 4.4.1 FTIR Studies of Alkali-activated Materials | 103 |
| 4.4.2 The Dissolution Rate | 104 |
| 4.4.3 Compressive Strength | 105 |
| 4.5 Effect of Activator Solution Type on the Properties of Hardened Geopolymers | 106 |
| 4.5.1 Mineralogical Composition | 106 |
| 4.5.2 Microstructure of Geopolymer Products | 107 |
| 4.5.3 FTIR Studies of Geopolymer Materials | 108 |
| 4.5.4 Compressive Strength | 111 |
| 4.6 Conclusions | 112 |
| References | 113 |
| 5. Additional Thermal Treatments of Bottom Ash and Property Evaluation of the Materials Applied in the Production of Geopolymers | 117 |
| <i>Rozineide Aparecida Antunes Boca Santa and Humberto Gracher Riella</i> | |
| 5.1 Introduction | 117 |
| 5.2 Geopolymer System | 119 |
| 5.3 Mineral Coal: Energy Production and Ash Generation | 120 |
| 5.4 Materials and Methods | 122 |
| 5.4.1 Characterization Techniques | 123 |
| 5.5 Results and Discussion | 124 |
| 5.5.1 Qualification and Quantification of Oxides Present in Bottom Ash by XRF | 124 |
| 5.5.2 Particle Size Distribution in Bottom Ash | 125 |
| 5.5.3 Mass Loss in Bottom Ash during the Additional Thermal Treatments at Different Temperatures | 126 |
| 5.5.4 TGA/DTA Analysis of Bottom Ash | 128 |
| 5.5.5 XRD Diffractograms for Bottom Ash | 128 |
| 5.5.6 FTIR Spectra of Bottom Ash Samples | 131 |
| 5.5.7 SEM/EDS Analysis of Bottom Ash | 132 |

| | | |
|--------------|-----------------------------------------------------------------------------------------------------------|------------|
| 5.5.8 | Characteristics of the Geopolymer Materials Obtained from Untreated and Thermally Treated Bottom Ash | 133 |
| 5.5.9 | Diffractograms of the Geopolymer Materials Produced From Bottom Ashes After Additional Thermal Treatments | 133 |
| 5.5.10 | FTIR Analyses of Geopolymer Samples | 136 |
| 5.5.11 | Resistance of the Geopolymer Paste from Bottom Ashes Before and After the Additional Thermal Treatment | 137 |
| 5.6 | Conclusions | 138 |
| | References | 140 |
| 6. | Reaction Kinetics of Fly Ash Geopolymerization by Analyzing Calorimetry Data | 145 |
| | <i>Susanta Kumar Nath</i> | |
| 6.1 | Introduction | 145 |
| 6.2 | Kinetics and Mechanism of Fly Ash Geopolymerization | 148 |
| 6.3 | Theoretical Background | 149 |
| 6.3.1 | Determination of Reaction Kinetic Parameters | 150 |
| 6.4 | Fly Ash Characterization | 153 |
| 6.5 | Fly Ash Geopolymerization Study Through ICC | 153 |
| 6.5.1 | Heat-curve Analysis | 153 |
| 6.5.2 | Total Heat of Reaction | 156 |
| 6.5.3 | Degree of Reaction | 158 |
| 6.5.4 | Reaction Mechanism | 158 |
| 6.5.5 | Rate Constant | 160 |
| 6.5.6 | Apparent Activation Energy Determination | 161 |
| 6.6 | Summary and Conclusions | 164 |
| | References | 165 |
| Index | | 173 |
