Preface	IX
1. Nanocellulose: A Review of Preparation, Properties and Applications	1
<i>Suman, Nitesh Kumar and Abhishek Kardam</i>	
1.1 Introduction: Origin and Evolution of Nanocellulose	1
1.2 Classification of Nanocellulose	2
1.3 Preparation Methods of Nanocellulose from Cellulose	2
1.3.1 Mechanical Method	3
1.3.2 Chemical Methods	4
1.3.3 Bacterial Method	4
1.4 Unique Properties of Nanocellulose	5
1.4.1 Physico-chemical Properties	5
1.4.2 Physical Properties	5
1.4.3 Morphological Properties	5
1.4.4 Mechanical Properties	6
1.5 Applications of Nanocellulose	6
1.5.1 Industrial Applications	6
1.5.2 Medical Applications	7
1.5.3 Nanocellulose Composites	10
1.5.4 Other Applications	10
1.5.5 Nanocellulose as Adsorbent for Heavy Metals	12
1.6 Conclusions	12
References	13
2. Nanocellulose-based Materials for Water Purification	19
<i>Sanna Hokkanen</i>	
2.1 Introduction	19
2.2 Adsorption and Membrane Filtration	21
2.3 Nanocellulose as Adsorbent and Membrane Material	22
2.4 Cellulose Modification for Water Treatment Applications	24

2.4.1	Chemical Modification	24
2.4.2	Composite Materials	25
2.4.3	Flitters and Membranes	26
2.4.4	Nanocellulose-based Nanostructured Photocatalyst	27
2.4.5	Nanocellulose-based Aerogels	27
2.5	Applications of Nanocellulose-based Materials for Water Treatment	28
2.5.1	Removal of Heavy Metals	28
2.5.2	Removal of Organic Pollutants	31
2.5.3	Bacterial Removal	35
2.5.4	Removal of Anionic Pollutants	35
2.5.5	Flocculant for Waste Water Effluents	36
2.6	Adsorbent Regeneration	37
2.7	Current Challenges and Future Perspectives	38
2.8	Conclusions	39
	References	42
3.	Characteristics and Applications of Bacterial Nanocellulose	53
	<i>Alicia N. Califano, María Laura Balquinta, Patricia Cerrutti, Silvina C. Andrés and Gabriel Lorenzo</i>	
3.1	Introduction	53
3.2	Bacterial Nanocellulose	55
3.2.1	BNC Synthesis	55
3.2.2	Properties	58
3.3	Applications	65
3.3.1	BNC as Food Additive	65
3.3.2	Further Applications of BNC	66
3.4	Conclusions	70
	References	70
4.	Nanocellulose as Reinforcement in Polymer Nanocomposites	77
	<i>Haleema Saleem and Vikas Mittal</i>	
4.1	Introduction	77
4.2	Types of Nanocellulose	79
4.2.1	Micro-fibrillated Cellulose	79
4.2.2	Nano-crystalline Cellulose	83

<i>Contents</i>	VII
4.2.3 Bacterial Nanocellulose	87
4.3 Use of Nanocellulose as a Reinforcement in Polymer Nanocomposites	89
4.3.1 MFC as Reinforcement in Polymer Nanocomposites	89
4.3.2 NCC as Reinforcement in Polymer Nanocomposites	91
4.3.3 BNC as Reinforcement in Polymer Nanocomposites	93
4.4 Summary	94
References	94
5. Nanocellulose Produced from Rice Hulls	103
<i>Janaina Mantovan, Gizilene Maria de Carvalho and Suzana Mali</i>	
5.1 Introduction	103
5.2 Rice Hulls	104
5.3 Production of Nanocellulose from Rice Hulls	107
5.3.1 Cellulose Extraction	107
5.3.2 Nanocellulose Isolation	112
5.4 Final Considerations	116
References	116
6. Nanocellulose: An Advanced Green Material	125
<i>Saleheen Bano, Asif Ali, Sauraj and Yuvraj Singh Negi</i>	
6.1 Introduction	125
6.2 Overview of Cellulose	126
6.2.1 Background	126
6.2.2 Structural Aspect and Properties	127
6.3 Classification of Nanocellulose	130
6.4 Cellulose Nanocrystals	132
6.4.1 Isolation of Cellulose Nanocrystals	132
6.5 Properties of Cellulose Nanocrystals	136
6.5.1 Inherent Properties	136
6.5.2 Liquid Crystalline Behavior of CNCs	138
6.5.3 Optical Properties	139
6.5.4 Barrier Properties	139
6.5.5 Rheological Properties	140
6.6 Pros and Cons of CNCs: Surface Modification	143

6.7	Processing of CNCs in Polymer Nanocomposites	144
6.7.1	Casting-Evaporation Method	145
6.7.2	Melt Compounding	145
6.7.3	Other Processing Techniques	147
6.8	Applications	148
6.8.1	Packaging	148
6.8.2	Waste Water Treatment	149
6.8.3	Energy Storage Devices	151
6.8.4	Biomedical Engineering	156
6.9	Conclusion	159
	References	159
