Preface	XI
1. Fuel Cells: New Advances	1
<i>Liyamol Jacob and Vikas Mittal</i>	
1.1 Introduction	1
1.2 Overview of Fuel Cells	2
1.2.1 Components and Chemical Reactions	2
1.2.2 History of Fuel Cells	3
1.2.3 Difference between Different Types of Fuel Cells	4
1.3 Different Types of Fuel Cells	5
1.3.1 Proton Exchange Membrane or Polymer Electrolyte Membrane (PEMFC)	5
1.3.2 Solid Oxide Fuel Cells (SOFC)	7
1.3.3 Alkaline Fuel Cells (AFC)	8
1.3.4 Direct Methanol Fuel Cells (DMFC)	10
1.3.5 Molten Carbonate Fuel Cells (MCFC)	13
1.3.6 Microbial Fuel Cells (MFC)	13
1.3.7 Phosphoric Acid Fuel Cells (PAFC)	15
1.3.8 Direct Carbon Fuel Cells (DCFC)	17
1.4 Conclusions	18
References	19
2. Electrospun Proton-conducting Membranes for PEM Fuel Cells	29
<i>Ryszard Wycisk and Peter N. Pintauro</i>	
2.1 Introduction	29
2.2 Electrospinning	31
2.3 Pore-filled Membranes	31
2.4 Dual-fiber Membranes	41
2.5 Single-fiber Blend Membranes	48
2.6 Concluding Remarks	51
References	52

3.	Chitosan and its Nanocomposites based Green Polymer Electrolyte Membranes for Fuel Cell Applications	57
	<i>Vijayalekshmi V. and Dipak Khastgir</i>	
3.1	Introduction	57
3.2	Chitosan based Membranes for PEMFC	59
3.3	Modification of Chitosan Membranes	61
3.3.1	Acid/Salt Doping and Crosslinking	62
3.3.2	Chitosan based Blends and Composites	66
3.3.3	Chitosan-Heteropolyacids (HPAs) Composites	74
3.4	Fuel Cell Performance	77
3.5	Summary and Conclusions	80
	References	81
4.	High-performance PEMs with Designed Proton Channels	89
	<i>Xupin Zhuang, Hang Wang and Bowen Cheng</i>	
4.1	Introduction	89
4.2	Proton Conduction Mechanisms in PEMs	91
4.3	Characterization Techniques	93
4.3.1	Proton Conductivity and IEC	93
4.3.2	Methanol Permeability	94
4.3.3	Water Uptake and Dimensional Stability	95
4.3.4	Mechanical Properties and Oxygen Stability	96
4.3.5	Fuel Cell Performance	96
4.4	Construction Methods of Effective Proton Channels for PEMs	96
4.4.1	Molecular Design	97
4.4.2	Porous Template	99
4.4.3	Nano-additive	100
4.4.4	Nanofiber	103
4.5	Challenges and Outlook	108
	References	108

5. Application of PVdF and PVdF-co-HFP in Direct Methanol Fuel Cell 119

Piyush Kumar, Manoj Kumar, P. C. Padhi, P. P. Kundu, S. Mohanty and S. K. Nayak

5.1	Introduction	119
5.2	Role of PEM	121
5.3	Requirements of PEM	122
5.3.1	High Proton Conductivity	122
5.3.2	Low Methanol Crossover	124
5.3.3	Thermal Stability	124
5.3.4	Low Cost	125
5.4	Factors Affecting the Performance of PEM	125
5.4.1	Thickness	125
5.4.2	Porosity	125
5.4.3	Temperature	126
5.5	Current Status of PEM based on PVdF-co-HFP	126
5.6	Future Direction	131
	References	131

6. Design and Synthesis of Sulfonated Poly(arylene ether)s 141

Catherine Marestin and Regis Mercier

6.1	Introduction	141
6.2	Sulfonated Main Chain Poly(arylene ether)s	141
6.2.1	Synthesis by Post-sulfonation	141
6.2.2	Synthesis by Direct Polycondensation of a Sulfonated Monomer	143
6.3	Sulfonated Aromatic Side Groups Poly(arylene ether)s	146
6.3.1	Synthesis by Post-sulfonation	146
6.3.2	Synthesis by Post-modification with Aryl Sulfonated Reagents	157
6.3.3	Synthesis by Polycondensation of Monomers with Sulfonated Aryl Side Groups	159
6.4	Sulfonated Aliphatic Side Chain Poly(arylene ether)s	160
6.4.1	Synthesis by Post-alkylation	160

6.4.2	Synthesis by Thiolenes Coupling Reaction	163
6.4.3	Sulfonated Main Chain Polymers with Sulfonated Side Chains	164
6.4.4	Synthesis by Polycondensation of Sulfonated Aliphatic Side Chain Monomers	165
6.5	Synthesis of Sulfonated Perfluoroalkyl Side Chain Poly(arylene ether)s	166
6.5.1	Via Ullmann Reaction	167
6.5.2	Via Nucleophilic Aromatic Substitution Reaction	170
6.5.3	Via Suzuki Reaction	172
6.5.4	Via Miscellaneous Reaction	173
6.6	Conclusion	174
	References	174
7.	Fuel Cell Applications of Polysulfone Derivatives, Blends and Nanocomposites	187
	<i>A. Pangajam and K. Dinakaran</i>	
7.1	Fuel Cell	187
7.2	Polymer Electrolyte Fuel Cell	187
7.3	Polymer Electrolyte Materials	189
7.3.1	Sulfonated Polymeric Membranes	189
7.3.2	Sulfonated Poly(ether ether ketone)	190
7.3.3	Sulfonated Poly(trifluorostyrene)	190
7.3.4	Perfluorinated Membranes of Nafion	190
7.3.5	Perfluorinated Membrane Aquivion	191
7.4	Polysulfone Derivatives	191
7.5	Polysulfone Blends	195
7.6	Polysulfone Nanocomposites	199
	References	205
8.	Insight on Some Fluorinated Copolymers Bearing Azole Groups for Fuel Cell Membranes	213
	<i>Fouad Malek, Tarik Harit and Bruno Ameduri</i>	
8.1	Introduction	213
8.2	Proton Exchange Membrane Fuel Cell	214

<i>Contents</i>	IX
8.3 Grafted Nitrogen Heterocycles on (Co)polymers for Elaborating HT-PEMFC	217
8.3.1 Immobilized Nitrogen Heterocycles on Poly(chlorotrifluoroethylene-alt-2-iodoethyl vinyl ether) Copolymer (poly(CTFE-alt-IEVE))	218
8.3.2 Immobilized Nitrogen Heterocycles on Polyvinylidene Fluoride (PVDF) Copolymer	224
8.3.3 Immobilized Nitrogen Heterocycles on Poly(ethylene-co- tetrafluoroethylene) Copolymer (ETFE)	227
8.3.4 Grafted Nitrogen Heterocycles onto Fluorinated Aromatic Copolymers	229
8.4 Conclusion	234
Notes and References	235
Index	243
