Preface	XI
I General Introduction	1
I.1 General rules for the laboratory	1
I.2 General rules	1
I.3 Some common poisons and their effects	2
I.4 Poisons for which vomiting should not be induced	3
I.5 Poisons for which vomiting should be induced	3
I.6 Handy first aid tips	4
I.7 Safety instructions	5
I.8 Report format	6
I.9 Regulations	7
I.10 Techniques	10
I.11 Qualitative analysis	10
I.12 Synthesis	12
II Qualitative Inorganic Chemical Analysis	15
II.1 Introduction	15
II.2 Acid and base theories	16
II.2.1 Arrhenius principle	16
II.2.2 Bronsted-Lowry principle	16
II.2.3 Lewis principle	17
II.3 Salts	17
II.4 Classification of acid and basic radicals	17
II.4.1 Preface	17
II.4.2 Reaction of acid radicals with dilute hydrochloric acid	19
II.4.3 Reaction of acid radicals with concentrated sulphuric acid	23
II.4.4 General group (Precipitation group)	26
II.5 Basic radicals	27
II.5.1 Group I	28
II.5.2 Group II	30
II.5.3 Group III	34
II.5.4 Group IV	37

	II.5.5 Group V	40
	II.5.6 Group VI	41
II.6	Separation and identification of basic radical mixtures	42
	II.6.1 Separation of group I	43
	II.6.2 Separation of group II	44
	II.6.3 Separation of group III	46
	II.6.4 Separation of Group IV	47
	II.6.5 Separation of group V	48
	II.6.6 Separation of group VI	48
II.7	The most important chemical reactions of basic radicals	49
	Questions	53
III	Qualitative Organic Chemical Analysis	57
III.1	Techniques	57
III.2	Identification and reactions	63
	III.2.1 Physical properties	63
	III.2.2 Solubility	64
	III.2.3 Action of dry heat	65
	III.2.4 Action of Soda lime	66
	III.2.5 Action of Sodium carbonate solution	68
	III.2.6 Action of 30% NaOH solution	68
	III.2.7 Action of concentrated sulphuric acid	69
	III.2.8 Reaction and coloration with iron (III) chloride	69
	III.2.9 Detection of elements (N, S, X) [sodium fusion test for solids only]	70
III.3	Functional group reactions and identification	71
	III.3.1 Alcohols (methyl, ethyl, 1-propanol, 2-propanol, glycerol, benzyl)	71
	III.3.2 Aldehydes and ketones	74
	III.3.3 Carboxylic acids	78
	III.3.4 Carboxylic acids salts	80
	III.3.5 Halogenated acids	81
	III.3.6 Phenols	81
	III.3.7 Esters	83
	III.3.8 Amines and salts	83

III.3.9	Amides and imides	85
III.3.10	Halogenated hydrocarbon	86
III.4	Synthesis of some organic compounds	87
	Experiment # 1	87
	Preparation of cyclohexene (dehydration of cyclohexanol)	
	Experiment # 1a	88
	Preparation of 2-methyl-2-butene (dehydration reaction)	
	Experiment # 2	90
	Preparation of cyclohexanone (oxidation of cyclohexanol)	
	Experiment # 3	92
	Preparation of adipic acid (oxidation of cyclohexene)	
	Experiment # 3a	92
	Preparation of cyclopentanone (decarboxylation of adipic acid)	
	Experiment # 4	93
	Preparation of n-butyl bromide	
	Experiment # 4a	94
	Preparation of ethyl iodide	
	Experiment # 5	95
	Preparation of acetyl salicylic acid (ASPIRIN)	
	Experiment # 6	98
	Preparation of n-amylacetate by Fischer method (azeotropic esterification)	
	Experiment # 7	99
	Preparation of soap (hydrolysis)	
	Experiment # 8	101
	Preparation of benzalacetophenone (Aldol condensation)	
	Experiment # 8a	102
	Preparation of dibenzalacetone (1, 5-diphenyl-1,4-pentadiene-3-one) (aldol condensation)	
	Experiment # 9	103
	Preparation of aniline (reduction of nitrobenzene)	
	Experiment # 9a	104
	Preparation of p-nitroaniline	
	Experiment # 10	107

Preparation of ethyl p-aminobenzoate (Bezocaine)	
Experiment # 11	110
Preparation of p-chlorotoluene (Sandmeyer reaction)	
Experiment # 12	112
Preparation of 3-aminobenzoic acid (nitration of methyl benzoate, reduction and hydrolysis)	
Experiment # 13	116
Preparation of 3-methyl-1-phenyl-5-pyrazolone	
Experiment # 14	117
Preparation of barbituric acid (hexahydro-2,4,6-trioxopyrimidine)	
Experiment # 15	118
Preparation of 2,5-dioxopiperazine	
Experiment # 16	119
Preparation of quinoline (Skraup synthesis)	
Experiment # 17	120
Preparation of 2,4,6-trimethyl quinoline	
Experiment # 18	121
Preparation of 2, 3-dioxindole (Isatin)	
Experiment # 19	122
Preparation of 2-methyl-4-quinolone	
Experiment # 20	123
Preparation of 1,2,3,4-tetrahydrocarbazole	
Experiment # 21	124
Preparation of 4,5-diphenylimidazole(4,5-diphenylglyoxaline)	
Experiment # 22	126
Preparation of 5,5-diphenylhydantoin (Phenytoin)	
Questions	128
IV Quantitative Analysis of Chemical Compounds	133
IV.1 Volumetric analysis	133
IV.1.1 Introduction	133
IV.1.2 Primary and secondary substances	133
IV.1.3 Primary and secondary solutions	133
IV.1.4 Classification of titrations	133

IV.1.5	The masses (weights)	136
IV.1.6	Preparation of standard solutions	139
IV.1.7	Titration methods	140
IV.1.8	Experimental applications	142
IV.1.9	Precipitation titration	144
IV.1.10	Complexometric titration	146
IV.1.11	Oxidation-reduction titration	147
IV.2	Gravimetric analysis	149
IV.2.1	Introduction	149
IV.2.2	Precipitation method	150
IV.2.3	Completeness of the precipitation	150
IV.2.4	Laboratory experiments	151
	Questions	157
V	Synthesis and Analysis of Some Coordination Compounds	159
	Experiment # 1	159
	Synthesis of bis(acetylacetonato)copper(II)	
	Experiment # 2	160
	Synthesis of hexaamminecobalt(III) chloride complex	
	Experiment # 2a	161
	Analysis of cobalt ion in $[\text{Co}(\text{NH}_3)_6]\text{Cl}_3$ complex	
	Experiment # 2b	162
	Analysis of chloride ion in $[\text{Co}(\text{NH}_3)_6]\text{Cl}_3$ complex	
	Experiment # 3	163
	Synthesis of chloropentaamminecobalt(III) chloride complex	
	Experiment # 4	165
	Synthesis of tetraamminecopper(II) sulphate hydrate complex	
	Experiment # 4a	167
	Analysis of copper ion in $[\text{Cu}(\text{NH}_3)_4]\text{SO}_4$ complex	
	Experiment # 4b	168
	Analysis of sulphate ion in $[\text{Cu}(\text{NH}_3)_4]\text{SO}_4$ complex	
	Experiment # 5	169

Synthesis of hexaamminenickel(II) chloride complex	
Experiment # 5a	170
Analysis of nickel ion in $[\text{Ni}(\text{NH}_3)_6]\text{Cl}_2$ complex	
Experiment # 5b	171
Analysis of ammonia in $[\text{Ni}(\text{NH}_3)_6]\text{Cl}_2$ complex	
Experiment # 5c	172
Analysis of chloride ion in $[\text{Ni}(\text{NH}_3)_6]\text{Cl}_2$ complex	
Experiment # 6	172
Synthesis of Potassium trioxalatoferrate(III) trihydrate complex	
Experiment # 6a	174
Analysis of oxalate ion in $\text{K}_3[\text{Fe}(\text{C}_2\text{O}_4)_3] \cdot 3\text{H}_2\text{O}$ complex	
Experiment # 6b	175
Analysis of iron (III) ion in $\text{K}_3[\text{Fe}(\text{C}_2\text{O}_4)_3] \cdot 3\text{H}_2\text{O}$ complex	
Experiment # 7	176
Synthesis of potassium trioxalatochromate(III) trihydrate complex	
Experiment # 7a	178
Analysis of chromium(III) ion in $\text{K}_3[\text{Cr}(\text{C}_2\text{O}_4)_3] \cdot 3\text{H}_2\text{O}$ complex	
Experiment # 8	179
Measuring the conductivity of complexes (verification of Werner's theory)	
Experiment # 9	182
Measuring the potentiometric of complexes	
Questions	185
Index	187
References	197
